

ADVANTAGES

- Energy savings through smart operations. Monitoring measured values in public spaces.
- Improved filter operational lifetime
- Control production quality
- Controlling the indoor air quality
- World wide air quality map

Application

Connectivity to all Camfil air cleaners

Power supply: 5V DC

Operating range particles μm : PM 1 and PM2.5

Operating range RH: 0 - 100 not condensating

Operating range temp : -10 to +50 (Accuracy +/- 3)

Comment

By connecting to an air cleaner you can lower the energy consumption - by raising and lowering the operating level of your Air Cleaners, depending on the number of particles in the air. The system saves energy and provides better protection of machines and people's health.
